DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This is a high, 2-1/2 story detached brick temple-shaped structure, two large bays wide and five in depth with the front entrance on the left (E) side and the gables at right angles to the street. The central bay on the left side projects with the main entrance and is topped by a pediment with returns and dentil trim. The white marble datestone is centered in this gable. Wide brick piers support the corners and divide the bays. All brickwork is unpainted and laid in common bond. All walls are buttressed at the base with four rows of corbelled bricks rising from the low fieldstone foundation. The main entrance occupies the central bay of the left side with double doors, a paneled enframement and a high, four pane overlight. All windows are large with 6/6 sash and metal lintels supporting flat brick arches of long shaped voussoirs. The roof has a moderate slope, "A" framing and is covered with asphalt shingles with square, half enclosed chimneys rising at the front and rear gables. These gables have overhanging boxed cornices with returns and trimmed with dentils and a wooden frieze as are the front and rear (side) rooflines.
